

Project: AHI Marketing Analytics App Development Project | Team: AHI App

Sprint Planning: 2 Sprints x 30 days each (Sprint 1: Jun 20XX | Sprint 2: Jul-Aug 20XX)

Story ID	Priority	Category	Team	Role (As a...)
0001	1	Leadership	AHI App Dev Team	AHI C-Suite Leader
0002	2	Marketing	AHI App Dev Team	AHI Marketing Analyst
0003	3	Finance	AHI App Dev Team	AHI Finance Team Member
0004	4	IT	AHI App Dev Team	AHI IT Technician
0005	5	Customer	AHI App Dev Team	AHI External Customer

STORY POINTS SCALE REFERENCE: 1 pt = Very Low Complexity | 2 pt = Low | 3 pt = Medium | 4 pt = High | 5 pt = Very High

PRODUCT BACKLOG		
Dev Team Product Owner: Cal Hamer Date: April 20XX		
XXX) Total Estimated Story Points: 19		
Need (I need...)	Value (So that...)	Acceptance Criteria 1
I need real-time access to current and evolving market segments and target demographics, with on-demand reporting	So that AHI can make data-driven strategic decisions to engage emerging markets and outpace competitors	1. Dashboard shows current market segment data updated in real time
I need to track current skincare industry market trends in real time, monitor customer interest and preferences, generate competitive analysis from global sales data, calculate AHI market share by product category, and access on-demand reports	So that marketing can make agile decisions on product positioning, pricing, and promotional strategies	1. Real-time market trend dashboard with data updated at minimum every 4 hours
I need to process secure order invoicing, view real-time inventory and product availability, and access on-demand financial sales and forecasting metrics	So that Finance can ensure accurate revenue tracking, maintain secure transaction processing, and support financial planning	1. Secure invoice generation and order processing with encrypted transactions
I need to ensure the app interfaces correctly with new hardware and software, verify compatibility with new IT security upgrades, and confirm IT storage meets operational needs	So that the app runs reliably, securely, and at scale for all internal and external users	1. App successfully integrates with all new hardware and software components (verified via integration test)
I need easy access to all AHI product offerings, secure invoicing, reliable order processing, and confirmation of all transactions	So that I can browse, purchase, and track AHI products conveniently, securely, and with confidence	1. Product catalog is searchable and fully accessible with accurate pricing
TOTAL STORY POINTS		

derate | 5 pt = High | 8 pt = Very High Complexity

Acceptance Criteria 2	Acceptance Criteria 3	Acceptance Criteria 4	Story Points
2. Filter by geography, age group, and product category	3. On-demand report generation with export to PDF/Excel	4. Drill-down capability from segment summary to individual data points	3
2. Customer preference and opinion analysis view with sentiment scoring	3. Competitive analysis report showing top competitors by product category and global market share	4. AHI market share tracker by product category with trend visualization and on-demand report export	8
2. Real-time inventory and product availability dashboard	3. On-demand financial sales reports with revenue forecasting module	4. Transaction audit log accessible to Finance Director	5
2. App and IT security upgrades pass full security compatibility audit	3. IT storage tested and confirmed sufficient for projected user load (200 internal, 4M external users)	4. Infrastructure performance meets defined SLA thresholds under peak load testing	3
2. Secure checkout with encrypted payment processing (PCI-DSS compliant)	3. Order confirmation sent via email within 2 minutes of purchase	4. Order tracking available in app with real-time status updates	5
